Lic. Jose Jaime HERRERA CORTES

C/Joaquin Vazquez 7 3⁰B

04007 ALMERIA

SPAIN

Dear Mr. Herrera Cortes,

The Romanian Space Agency (ROSA) appreciates the endeavors undertaken in Mexico in order to establish the Mexican Space Agency (AEXA) and strongly believes that the endorsement of the law on the creation of AEXA would be a further step towards the sustainable development of the space research and space applications fields, which will bring many benefits to the Mexican society, research community and industry. Also, it would be a gateway to a strengthened international cooperation.

The ROSA is the governmental organization which coordinates and promotes the space activities in Romania, for more than fifteen years. Since 2006, a Sub-committee for Space was established within the Romanian Parliament with the view to support the space activities and development.

If you appreciate that the organizational evolution of ROSA might be helpful for your endeavour, please do not hesitate to ask any support from us.

Looking forward to hearing about the outcome of your endeavors, the Romanian Space Agency would like to express the appreciation for your timely information to the international community
