Kyiv, July 30 2008

Dear Senator,

The National Space Agency of Ukraine welcomes the decision of the Mexican Chamber of Deputies to establish the Mexican Space Agency (AEXA). Your nation's desire to join international activities and projects on space uses in peaceful purposes will foster the development of space sciences, space information utilization, remote Earth sensing and Earth observation. The objective of a space agency is to integrate current and future space programs, develop the national space researches system, provide control for the space branch enterprises and organize scientific cooperation. AEXA establishment and modern space technologies implementation will enhance your country's economy. Mexico and other states will profit from this.

The National Space Agency of Ukraine is ready to cooperate with AEXA in space exploration and utilization.

Sincerely,

Eduard Kuznietsov  
Deputy Director General,  
NSAU
